Art Unit: 3653

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 through 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not understood how "a belt" contacting a "transmission roller" and an "indication roller" provides an indication as recited in lines 10-11 of claim 1. The claims fail to provide a sufficient structural and operative relationship to establish how an indication is provided. Further, it is not clearly understood what is being indicated by the indication.

In claim 3 line 3, claim 4 line 3, it is not understood what is meant by the language "the belt contacted with the groove."

In claim 5 line 3 and claim 6 line 3, it is not understood what is meant by the language "the belt contacted within the plurality of teeth portions."

Claim 8 is inaccurate in reciting the opening is mounted on the transparent element as it is the transparent element which is disclosed as being mounted in the opening.

3. Claims 1 through 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feed module and

Art Unit: 3653

the measure line or a notch must be shown or the feature(s) canceled from the claim(s).

No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H Bollinger whose telephone number is 703-308-1113. The examiner can normally be reached on Monday through Friday from 9:00 am to 5:00 pm.
